

Affordable Individual & Family Identity Theft Protection

Why Family-IDprotect® is Different

- Most identity theft providers charge for FREE services you can get on your own!
- Most identity theft providers are too expensive and many families can only afford “Individual” protection at a cost of \$100 or more per year. Our “Family” protection costs less than \$7/month; individual less than \$5/month. Use **PROMO CODE ‘IHFRA10’** for 10% off our everyday low price.
- The majority of individuals and families don’t need \$1,000,000 in stolen cash or expense reimbursement expenses. We provide more than sufficient insurance coverage.
- We don’t scare you into purchasing services that are unnecessary, or you won’t use, like “Dark Web Monitoring”. Once the bus runs over you, you don’t need us to tell you you’ve just been run over by a bus! Visit our FAQ’s on www.family-idprotect.com.
- We don’t partner with anti-virus software companies to sell you more free services.
- Our program provides more pathways for individuals and families to utilize our service, such as “Disaster Assistance”, “Marriage & Divorce Identity Services” and “Travel Identity Assistance”.
- Our educational website provides no nonsense information to our subscribers without trying to sell additional services!

SERVICES YOU CAN GET FREE ON YOUR OWN

- 3 FREE credit reports at least once a year: www.AnnualCreditReport.com.
- Credit Freezes and Year-Long Fraud Alerts are FREE from the three credit bureaus.
- Windows users can perform a FREE virus scan with Panda, and it will disinfect found viruses. Panda will solicit you to upgrade to their antivirus software. Simply go to: <https://www.pandasecurity.com/usa/homeusers/solutions/cloud-cleaner/>
- Add an Anti-Virus Software to your computer. There are a lot of free options on the internet; just Google “free antivirus software”. They will all attempt to upgrade you to a pay option. www.top10bestantivirus.com/best-free-antivirus
- WINDOWS 10 users already have the FREE “Windows Essential Security” installed; just activate it. WINDOWS 07, VISTA or 08 users can download “Windows Essential Security” at www.microsoft.com/en-us/download/details.aspx?id=5201
- MAC users can visit <https://www.avast.com/en-us/free-mac-security> for essential antivirus protection.
- For FREE Malware Removal, and if you are a WINDOWS user go to www.microsoft.com/en-us/download/malicious-software-removal-tool-details.aspx
- If you wish to use an anonymous browser visit www.torproject.org/projects/torbrowser.html.en for a FREE download. VPN’s are available for a fee. This browser will be slower than your conventional browsers. A “Tor” anonymous email address has an annual fee and can give you added protection from hackers; <https://torguard.net/anonymous-email.php>. Additional Dark Web providers are listed online.
- For a non-profit browser with higher privacy protection protocols visit www.duckduckgo.com or www.mozilla.org/en-US/firefox/new/. These are not “Dark Web” browsers and will give you the relative speed as Google Chrome.
